Narrative

INTRODUCTION

Currently detention is provided for the campus in five separate detention basins: West Lake, Southwest Basin, North Basin, East Lake, and Southeast Basin and are permitted under MWRD Permit No. 87-787. Of the 7.75 acres being affected by the proposed improvements 6.57 acres are tributary to West Lake, the remaining 1.22 acres are tributary to the Southwest Basin.

EXISTING CONDITIONS

In its current state, West Lake outfalls from an existing 10" sewer that is tributary to the Southwest Basin. The release rate of this sewer is calculated to be 3.00 cfs, less than the permitted 3.50 cfs according to MWRD Permit No. 87-787. This release and the existing tributary area of 14.87 acres create a required storage volume of 3.78 acre-feet, less than the available 4.52 acre-feet at an elevation of 689.00. Overflow from West Lake is currently a grassed area to the south of the lake that conveys water to Moorings Drive and the Southwest Basin.

PROPOSED CONDITIONS

Improvements around West Lake will expand the tributary area to encompass 15.23 acres and increase the impervious area by approximately 1 acre. Per Arlington Heights allowable release of 0.18 cfs/acre and the revised tributary area for West Lake, the new allowable release will be 2.74 cfs. Including the new impervious area equates to a new required volume of 4.31 acre-feet. Although the existing lake provides adequate detention, in order to provide adequate freeboard to the proposed Finished Floor Elevations the existing High Water Level will be lowered from 689.00 to 688.25 and the existing footprint will be expanded. Overflow from West Lake will be provided for at weirs in both the Restrictor Manhole and as a 40' grass spillway on the surface to ensure water is directed away from the new Assisted Living building and Resident Fellowship Hall. Restricted flow and Overflow from West Lake will remain tributary to an existing Bypass Swale and Sewer that run along the south of the Site.

Additional flow to the Southwest Basin will be investigated but it is not anticipated that significant improvements will be required.

STORM SEWER

Currently storm water is conveyed to West Lake through two pipe networks. One located to the northwest of the lake that conveys storm water from the north end of the site and one that conveys runoff from the Skilled Care courtyard. Both systems will be impacted by the new building footprints and will be re-routed underneath the connection between the Assisted Living building and Resident Fellowship Hall.

The proposed buildings will also impact existing overland flow routes. New pipe systems tributary to West Lake will be sized to convey runoff from the 100-year rain event.

1

1. Adequacy of Design. The schedules, plans, specifications and all other data and documents submitted for this permit are made a part hereof. The responsibility for the adequacy of the design shall rest solely with the Design Engineer and the issuing of this permit shall not relieve him of that responsibility. The issuance of this permit shall not be construed as approval of the concept or construction details of the proposed facilities and shall not absolve the Permittee, Co-Permittee or Design Engineer of their respective responsibilities.

CONDITIONS OF THE PERMIT

87-787

- Joint Construction and Operation Parmits. Unless otherwise stated by the Special Conditions, the issuance of this permit shall be a joint construction and operation permit provided all General, Standard and Special Conditions are complied with.
- 3. Allowable Discharges. Discharges into the sanitary sewer system constructed under this permit shall consist of sanitary sewage only. Unless otherwise stated by the Special Conditions, there shall be no discharge of industrial wastes under this permit. Storm waters shall not be permitted to enter the sanitary sewer system. Without limiting the general prohibition of the previous sentence, roof and footing drains shall not be connected to the sanitary sewer system.
- 4. Construction inspection. All sewer construction shall be inspected and approved by a Registered Professional Engineer acting on behalf of the Permittee or the owner of the project, or by a duly authorized and competent representative of the Professional Engineer. No sewer trenches shall be backfilled except as authorized by the Inspection Engineer after having inspected and approved the sewer installation.
- 5. Maintenance. The sewer connections, lines, systems or facilities constructed hereunder or serving the facilities constructed hereunder shall be properly maintained and operated at all times in accordance with all applicable requirements. It is understood that the responsibility for maintenance shall run as a joint and several obligation against the property served, the owner and/or the operator of the facilities, and said responsibility shall not be discharged nor in any way affected by change of ownership of said property.

MSDGC STANDARD CONDITIONS

- 6. Indemnification. The Permittee shall be solely responsible for and shall defend, indemnify and save harmless the Metropolitan Sanitary District of Greater Chicago (hereinafter MSDGC) from and against any and all claims, costs, damages, or expenses the MSDGC may suffer, incur, sustain or become liable for on account of any injury to, or death of, any person or persons, or any damage to, or destruction of, any real or personal property that may be caused by the construction, use, state of repair; operation and maintenance of the proposed facilities, arising out of or in consequence of the issuance of this permit. Without limiting the generality of the preceding sentence, the provisions of this paragraph shall extend to indemnify and save harmless the MSDGC from any claims or damages arising out of or in connection with the termination or revocation of this permit.
- 7. Construction by MSDGC. Permittee understands and acknowledges that the MSDGC has the right and power to construct and extend sewer service facilities and render such services within the area to be served by the project for which this permit is issued, and that by the MSDGC constructing and extending such sewer service facilities and rendering such services, the facilities constructed by the Permittee under this permit may decrease in value, become useless or of no value whatsoever, the Permittee may also sustain a loss of business, income and profits.

Therefore, by accepting this permit and acting thereon, the Permittee, for itself, its successors and assigns, does remise, release and forever discharge the MSDGC of any and all claims whatsoever which Permittee may now have or hereafter acquire and which Permittee's successors and assigns hereafter can, shall, or may have against the MSDGC for all losses and damages, either direct or indirect, claimed to have been incurred by reason of the construction or extension at any time hereafter by the MSDGC of sewer service facilities in the service area contemplated by this permit, the rendering of such services, which MSDGC facilities and services decrease the value of the facilities constructed by the Permittee under this permit, make same useless or of no value whatsoever, including but not limited to, any and all damages arising under Illinois Revised Statutes, Chapter 42, Section 339; the taking of private property for public use without due compensation; the interference with the contracts of Permittee; the interference with Permittee's use and enjoyment of its land; and the decrease in value of Permittee's land.

- 8. Third Parties. This permit does not grant the right or authority to the Permittee: (a) to construct or encroach upon any lands of the MSDGC or of any other parties. (b) to construct outside of the territorial boundaries of the MSDGC, (c) to construct or encroach upon the territorial boundaries of any units of local government within the MSDGC, (d) to connect to or discharge into or be served by (directly or indirectly) any sewer or sewer system owned or operated by third parties.
- Costs. It is expressly stipulated and clearly understood that the sewerage system or facilities for which the permit is issued shall be constructed, operated and maintained at no cost to the MSDGC.

SCHEDULE A - BASIC INFORMATION

1. PROJECT INFORMATION:

Name of project (as shown on plans) The Moorings of Arlington Heights, Illinois Location of project (street address or with respect to two major streets) 801 Central Road Municipality (Township, if unincorporated) Arlington Heights, Illinois

ASDE

2. APPROXIMATE TIME SCHEDULE:

Sewerage Facilities Construction Schedule: Start of Construction $\underline{-9/87}$; Date of Completion $\underline{12/88}$ Occupancy Schedule: Date Occupancy Begins $\underline{12/88}$; 100% Occupancy to be reached by $\underline{12/90}$

3. APPURTENANCES:

Project includes the following: (check applicable items by "X"): Manholes [X]; Catch basins or inlets [X]; Catch basin restrictors []; Drop Manholes []; Stream Crossing []; Siphon []; Direct Connections to MSDGC Facilities [].

4. RECEIVING SANITARY SEWER SYSTEM:

System to which project will connect is existing [X]; proposed []; under construction []. If proposed or under
construction by applicant, indicate MSDGC Permit No. <u>N/A</u> ; (IEPA Permit No. <u>N/A</u>). Identify
owners of all sewer systems from project to MSDGC interceptorKimball Hill Inc. Arlington Hydr
If project discharges directly or indirectly to a local combined sewer, the receiving combined sewer does [], does
not [] have an overflow. If overflow exists, discharge is made to by means of
(FOR OFFICE USE: Receiving MSDGC Treatment Plant and/or Lift Station Olfing e Tr
Point of Discharge of Sanitary Sewers; X L L L L J , Y L L L L J , Code LOLOLA
SB <u>[]]]-1014</u>)

5. EXISTING LIFT STATION: None

Receiving system includes an existing local Lift Station Yes [], No []; Project is [], is not [] in design service area of lift station. Location of existing lift station ______; Rated capacity of lift station ______ gpm; MSDGC or other permit number under which lift station was constructed ______; Existing lift station does [], does not [] have stand-by power; does [], does not [] have an overflow; if there is an overflow, overflow discharges to storm sewer [], to waterway [], name of waterway ______.

6. FLOOD PLAIN

Project area is partially (or totally) in flood plain Yes [], No [X]; if yes, complete the following: Percent of area in flood plain ______%. Flood crest elevation is ______; Name of USGS Quadrangle __<u>Arlingfort by 5_____</u>. Volume of flood storage available prior to development (Volume between flood crest elevation and existing ground) _____Cu. Yd. Volume of fill made in flood plain _____Cu. Yd. Compensatory storage provided _____Cu. Yd. Identify any manholes in flood plain _____

7. AREA AND DRAINAGE OF PROJECT:

Area of this project 23-342 acre(s). Total contiguous property ownership, including this project, 42.1 acre(s). Existing impervious area within project, if any (paved, roofed, etc.) 0-92.8 acre(s). New impervious area created within project (paved, roofed, etc.) 11.0 acre(s). Manner of drainage: Storm sewer provided [X]; Catch basins or inlets [X]; Surface runoff [X]; Other [X], describe: <u>lakes and detention basins</u>

8. DETENTION:

Detention is provided under this permit: Yes [X], No []. Detention is required by MSDGC [], local government [X], other [], describe 2 lakes and 2 detention areas

(MSDGC USE ONLY: Point of discharge of storm waters; X L L L L L ; Y L L L L L : DB 151(10)

NAMAAAAAAAAA AAAAAAAAAAAAAAAAAAAAAAAAAA	(Name of Partnership	a)	permit application (co	

the property which is the subject of a certain sewerage system permit appl indicated and designated by the number shown above) filed with the Metropolitan Sanitary District of Greater Chicago, which property is shown on the attached plat of survey which together with the legal description of the property are attached hereto as Exhibit "A" and specifically incorporated by reference herein.

B. Affiant further states that said property described in Exhibit "A" has a total area of _ acres and constitutes the total contiguous ownership of the owner, and that the portion of the property currently proposed for development consists of 43 acres, and the property is intended for u described hereinafter: Continuing Care Retirement Community for older adults and acres, and the property is intended for use as related nursing home center.

*C. Affiant further states that, because of its size and intended use, the property described in Exhibit "A" comes under the requirements of the MSDGC with respect to the establishment of on-site storm water detention, and that such detention facilities will be provided as part of the project in accordance with the design and calculations furnished to satisfy said requirements with respect to the property described in Exhibit "A", and further states that:

1. The owner of the property or any beneficiary of a land trust, if any, which is the record title holder of the property has no present interest, nor had any interest at any time during the previous two years, in any lands contiguous to said property. (If such interest is or was held, detention must be provided for the total.)

2. No owner of any lands contiguous to the property and no beneficiary of a land trust, if any, which is the record title holder of any land contiguous to the property has any interest in the property. (If such interest is held, detention must be provided for the total.)

offiant understands and agrees that any permit issued by MSDGC in reliance upon this affidavit shall be deemed to contain a special condition that if, within two years after the issuance of the permit, the owner or any beneficiary of a land trust, if any, which is the record title holder of the property, acquires any interest in lands contiguous to the property, the owner shall provide for storm water detention for such lands in which an interest is acquired, regardless of the size of such lands.

.4

MSD Permit Application NST = 787

AFFICE ASPY

This affidavit is given to induce the Metropolitan Sanitary District of Greater Chicago to issue its sewerage system permit with respect to the aforedescribed property and to exempt said property from any present requirements to provide and maintain storm water detention facilities thereon.

E. Affiant further states, that for the purpose of this affidavit, the following terms have the meanings indicated:

Owner: means record title holder or a beneficiary of a land trust which is the record title holder, and includes singular and plural; if the owner is other than an individual, the term includes beneficiaries, agents, shareholders, officers and directors.

Ownership: means holding of record title or any beneficial interest.

Interest: means property interest or contractual interest, legal or equitable, directly or indirectly, in part or in full, and includes option to buy. In the case of shareholder interest, the shareholder shall be deemed to have interest if he owns or controls 5% or more of the shares.

<u>Contiguous:</u> means adjacent to and touching at one point or more; if the lands are separated by an easement or a dedicated right-of-way, it shall be considered contiguous.

F. Affiant understands and agrees that in the event that any of the aforementioned information is incorrect, erroneous, false or misleading, the District shall have the option to immediately terminate any permit issued based on the above information.

MSDGC Permit No.

IEPA Log No.

CERTIFICATE BY DESIGN ENGINEER: I hereby certify that the project described herein has been designed in accordance with the requirements set forth in this application and all applicable ordinances, rules, regulations, Local, State and Faderal Laws, and design criteria of the issuing authority; that the storm drainage and sanitary sewer system designed for this project are proper and adequate; that, where the design involves one or more connections to an existing local sewer system, the capacity of said system has been examined and the system is found to be adequate to transport the wastewater that will be added through the proposed sewer without violating any provisions of the Illinois Environmental Protection Act or the rules and regulations thereunder.

Engineering Firm: Austin Engineering Co., Inc. Telephone: (309) 691-0224 Engineering Firm: Austin Engineering Co., Inc. SCHEDULE B - SEWER CONNECTIONS

BUILDING INFORMATION: Building sewer connections are [X], are not [] part of this permit; if part of this permit, complete the following:

- 1. TYPE OF CONSTRUCTION: Residential [X], Commercial [], Light Industrial [], Manufacturing [], Recreational [], Existing Septic System to be abandoned [], Other _______.
 - 2. RESIDENTIAL BUILDINGS: Single Family [], Multiple Family [X]. If single family: Total dwelling units ; Estimated total population______. If multiple family: Number of buildings_6_____; Number of dwelling units per building 251 Total ; Total number of sewer connections 11______; Estimated total population 542 + 50 employees (est.)
 - 3. NON-RESIDENTIAL BUILDINGS: Describe use of building______None______.
 Product manufactured or process used ________.
 Number of buildings to be served under this permit _______. Number of sewer connections under this permit ______.
 Estimated number of employees _______. Estimated number of occupants (transients)______. Estimated total flow _______. gpd. Population equivalent (If based on BOD, use IPCB basis)______.
 - 4. BUILDING USE: Use of building will involve the following: Food preparation Yes [X] No []; Food processing Yes [] No [X]; Auto Service Yes [] No [X]; Auto Wash Yes [] No [X]. If building involves any of these uses, indicate if sewer connections will receive domestic sewage only [], will receive other wastes (commercial, not industrial) [X]; if wastes other than domestic are discharged, indicate method of control being provided; Grease separator [X], Triple Basin [], Mud Basin [], other [] specify_________. Indicate whether control is inside [X], or outside building [22]. Industrial waste is [], is not [X] produced by the intended use of the building. (Unless permitted under the special conditions, discharge of industrial waste is prohibited). If industrial waste is produced, submit Schedule F, indicate method of disposal ______N/A_____.

This project includes a swimming pool: Yes [X], No []; if yes, submit piping drawings.

5. Complete summary of Sanitary Sewers on Schedule C.

(Future swimming pool)

* Apartments Su rent

SCHEDULE C - SEWER EXTENSIONS

NATURE OF PROJECT: Project consists of single sewer extension to serve the building(s) indicated above (normality according to serve a subdivision) []; Consists of a trunk sewer only (outlet sewer with no proposed connections) to serve future development []. Project is publicly financed Yes [], No [X].

AREA AND POPULATION: Submit a map of service area and complete the following:

- 1. Area serviceable by the sewers covered by this permit (including area to be served hereunder) 23.3 acres; population 542 + 50 employees
- 2. Potential service area of sewers covered by this permit, including planned or anticipated extensions 28.9 ____acres; population 596 +50 employees
- 3. Design flow: average (if based on other than 100 gpcpd) <u>61,350</u> gpcpd; Maximum design flow as percent of average <u>400%</u>. (Use MSDGC Manual of Procedures, Article 3 7).
- 4. Basis of design for area zoned or planned for non-residential use: Average design flow <u>N/A</u> gpd/acre. Maximum design flow as percent of average ______,

SUMMARY OF SANITARY SEWERS (INCLUDE ALL SEWERS IN COMBINED SEWER AREA): Include building service sewers (stubs or risers) if any.

Pipe size - inches	1.0"	8" 🖌	6"	#1 VCP ASTM C-700

SPECIAL CONDITIONS FOR PERMIT NO. 87-787

- 1. All waste containing grease shall be discharged to a grease interceptor or grease trap before discharge into the sewer with the exception of restaurant dishwashers, which shall have their discharge bypass the grease separator or grease trap and discharge to an open drain or directly to the sanitary sewer.
- 2. This permit is issued in reliance upon the Affidavit of Disclosure of Property Interest (Schedule K) submitted by the owner, and said Affidavit is incorporated herein and made a part hereof.
- 3. The storm water detention facilities shown on the plans are made a part of this permit. Constructon of these facilities shall proceed prior to or concurrently with other construction on the project and shall be completed before any occupancy occurs. The detention is provided by two (2) lakes and four (4) detention basins with 6 outlet pipes as tabulated:

Basin/Lake	Outlet Pipe Diameter (inches)
North Basin	8
N.E. Basin	6
East Lake	8
S.E. Basin	6
West Lake	10
S.W. Basin	8

4. A swimming pool is not included under this permit. A new permit will be required for the swimming pool.

- OFFICE COPY
- 10. Other Construction. The MSDGC reserves the right, privilege and authority to permit others to reconstruct, change, alter and replace all sewers and appurtenances thereto at the point of connection of any sewerage system to an MSDGC interceptor and/or in public right-of-ways of MSDGC easements, and to introduce additional sewage flow through this connection into the intercepting sewer of said MSDGC.
- 11. Change of Use. This permit shall be incorporated in the Building and Occupancy Permit for the building or buildings served under this permit. The owner or occupant of any building served under this permit shall not cause, or permit, a change of use of the building to a use other than that indicated in this permit without first having obtained a written permission from the General Superintendent of the MSDGC.
- 12. Interceptors Overloading. The MSDGC hereby serves notice that its interceptors may flow full and may surcharge, and flooding of the proposed system may occur. The Permittee agrees that the proposed systems shall be constructed, operated and maintained at the sole risk of the Permittee.
- 13. Non-Transferability. This permit may not be assigned or transferred without the written consent of the General Superintendent of the MSDGC.
- 14. Termination. It is understood and agreed that in the event the Permittee shall default in or fail to perform and carry out any of the covenants, conditions and provisions of this permit and such default or violation shall continue for sixty (60) days after receipt or notice thereof in writing given by the General Superintendent of the MSDGC, then it shall be lawful for the MSDGC at or after the expiration of said sixty (60) days to declare said permit terminated. The Permittee agrees that immediately upon receipt of written notice of such termination it will stop all operations, discontinue any discharges and disconnect the sewerage system or facilities constructed under this permit. If the Permittee fails to do so, the MSDGC for said disconnection. The various rights and remedies of the MSDGC contained in this permit shall be construed as cumulative, and no one of them shall be construed as exclusive of any one or more of the others or exclusive of any other rights or remedies allowed by applicable rules, regulations, ordinances and laws. An election by the MSDGC to pursue any other rights or remedies provided under the terms and provisions of this permit or under any applicable rules, regulations, ordinances or laws.
- 15. Expiration. This permit shall expire if construction has not started within one (1) year from the date of issue. Construction under an expired permit is deemed construction without a permit. All construction under this permit shall be completed within two (2) years after start of construction. If conditions so warrant, an extension may be granted. For publicly financed projects (e.g. special assessments) the one (1) year period indicated will be considered from the date of final court action.
- 16. Revocation. In issuing this permit, the MSDGC has relied upon the statements and representations made by the Permittee or his agent. Any incorrect statements or representations shall be cause for revocation of this permit, and all the rights of the Permittee hereunder shall immediately become null and void.
- 17. Advance Notice. Prior to commencement of construction under this permit, the Permittee shall give the MSDGC an advance notice of at least two working days. When advance notice is given, the Permittee shall provide the permit number, municipality and location.
- 18. Compliance with Plans and Specifications. All construction shall be in accordance with the plans and specifications submitted for this permit and made a part hereof. No changes in, or deviation from the plans and specifications which affect capacity, maintenance, design requirements, service area or permit requirements shall be permitted unless revised plans shall have been submitted to, and approved by, the MSDGC. The permit together with a set of the plans and specifications, if any) shall be kept on the job site at all times during construction until final inspection and approval by the MSDGC.
- 19. Testing and Approval. All construction under this permit shall be subject to inspection, testing and approval by the MSDGC. All testing shall be made, or caused to be made, by the Permittee at no cost to the MSDGC and in the presence of the MSDGC representative. Upon satisfactory completion of construction, the Permittee and the owner shall submit, or cause to be submitted, a completion certificate and request for approval on the form prescribed by the MSDGC. No sewer or other facilities shall be put in service until all the conditions of the permit have been satisfactorily met.
- 20. "As-Constructed Drawings." Within sixty (60) days after final inspection and approval by the MSDGC, the Permittee shall furnish, or cause to be furnished to the MSDGC, a set of "As-Constructed" drawings, or a statement that the project was constructed in accordance with the original plans and specifications.
- 21. Compliance with Rules and Regulations. The Permittee hereby expressly assumes all responsibilities for meeting the requirements of all applicable rules, regulations, ordinances and laws of Local, State and Federal authorities. Issuance of this permit shall not constitute a waiver of any applicable requirements.

87-787

SPECIAL CONDITIONS: This parmit is issued subject to the MSDGC's General Conditions, Standard Conditions and the following Special Conditions:

MSDGC Permit No. IEPA

ATTACHED HERETO IS ONE PAGE OF SPECIAL CONDITIONS MADE A FART HEREOF.

SEWER LINE AGREEMENT

For The Mooring, of Alington Heights

DFFICE COPY

This Agreement made this 28th day of March, 1988, by and between PARKSIDE DEVELOPMENT CORPORATION d/b/a THE MOORINGS, a Delaware non-profit corporation, with its office and principal place of business at 1775 West Dempster Street, Park Ridge, Illinois 60068 (hereinafter referred to as "PDC") and KIMBALL HILL, an individual with his principal place of business at 900 Des Plaines Avenue, Des Plaines, Illinois 60016 (hereinafter referred to as "Kimball Hill").

WITNESSETH

WHEREAS Kimball Hill owns and maintains the sanitary sewer along Central Road in Arlington Heights, Illinois (hereinafter "Sewer");

WHEREAS PDC is the owner of a certain parcel of property upon which it is developing an older adult retirement facility and health care center located at 801 Central Road, Arlington Heights, Illinois, known as The Moorings (hereinafter referred to as "Facility"); and

WHEREAS PDC is desirous of connecting the Facility to the Sewer if the same is extended southerly toward the Facility.

NOW THEREFORE, the parties hereto, in consideration of the mutual covenants and agreements herein, do hereby agree as follows:

Section 1. Construction of Sewer Line

19月1日月日 化黄

87 787

Subject to the terms and conditions of this Agreement, PDC is granted the perpetual non-exclusive right to construct a sanitary sewer line (the "Project") northerly across its property suitable for the Facility's connection to the Sewer at Central Road. Section 2. Payment of the Tap-in Fee

a sa an an an

PDC agrees to pay Kimball Hill upon the execution of this Agreement a one-time tap-in fee for the perpetual non-exclusive right to tap-on to and use the Sewer for the entire Facility's sanitary sewage needs.

87-787

Section 3. Notice to Governmental Authorities

Upon execution of this Agreement, Kimball Hill will, upon the request of PDC, notify the Metropolitan Sanitary District ("MSD"), the Village of Arlington Heights ("Village") and other appropriate parties of the grant by Kimball Hill to PDC to tap-in to the Sewer in accordance with the terms of this Agreement. PDC shall obtain all required governmental and other permits, licenses, approvals and other consents, and shall comply with all applicable laws, rules and

regulations.

Section 4. <u>Title to the Sewer Line</u>

Title to the Sewer is vested in Kimball Hill. Neither PDC, the Village or MSD shall have any claim of ownership in or to the Sewer or

the Project.

Section 5 <u>Maintenance of the Sewer Line</u>

Kimball Hill shall keep and maintain, or cause to be kept and maintained, the Sewer and its related systems in good operating condition, repair and working order, ordinary wear and tear excepted, and will provide, at its own expense, all maintenance and service and make all repairs necessary for such purpose.

-2-

Section 6. Indemnification

6

The parties agree to indemnify and hold each other harmless from any liability claim for personal injuries, deaths, mechanics liens, judgments, lawsuits, claims or other costs, including reasonable attorneys' fees, arising out of or in connection with the intentional or negligent acts of their respective employees and/or agents as a consequence of or resulting from, directly or indirectly, the tap-in or use of the Sewer.

87-787

1.25

Section 7. <u>Termination for Breach of Contract</u>.

If either party shall violate any of the covenants undertaken herein, or any of the duties imposed upon it by this Agreement, such violation shall entitle the other party to terminate this Agreement, provided that the party desiring to terminate for such cause shall give the offending party at least thirty (30) days written notice, specifying the particulars wherein it is claimed that there has been a violation hereof; and if at the end of such time the party notified has not removed the cause of complaint, or remedied the purported violation, then the termination of this Agreement shall be deemed complete.

Section 8. Specific Performance

The parties hereto each acknowledge and agree that in the event of any breach of this Agreement, the non-breaching party would be irreparably harmed and could not be made whole by monetary damages alone. It is accordingly agreed that such parties, in addition to any other remedy to which they may be entitled at law or in equity, shall

Ĩ,

be entitled to compel specific performance of this Agreement in any action instituted in any Court of the United States or any state having subject matter jurisdiction.

Section 9. Amendments

This Agreement may be amended only by a written instrument signed by all parties to this Agreement.

Section 10. Law of the State of Illinois to Govern

This Agreement and the rights and obligations of the parties hereunder shall be governed by, and construed in accordance with, the laws of the State of Illinois.

Section 11. Successors and Assigns

This Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their heirs, successors and assigns. This Agreement may not be assigned by any party without the consent of all the other parties.

Section 12. Interpretation of Agreement

The rule of strict construction does not apply to this grant. This grant shall be given a reasonable construction so that the intention of the parties to confer a commercially useable right of enjoyment to the Sewer is carried out.

Section 13. Notices

والأعرب والمراجع والمراجع والمراجع

All notices and other communications shall be sufficiently given and shall be deemed to be given when hand delivered or mailed by registered or certified mail, postage prepaid, addressed as follows:
